

Case Study

Productization of Data Center Migration

Management Consulting

Client Context

A Consulting firm wanted a Data Center Migration solution using a visual drag-and-drop interface and supporting the GTM.

Value Delivered

30%

increased velocity of sales due to faster go-to-market.

53%

Quicker visualization from “as is” organization and “to be” organization of the hardware and software was possible in hours rather than weeks.

Process Areas

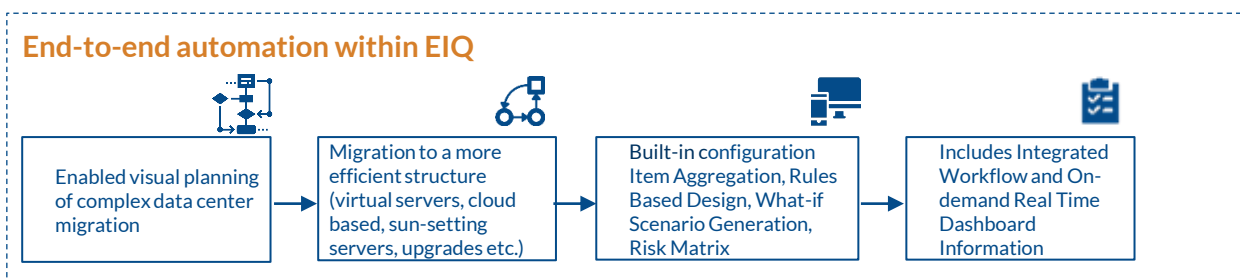

Data Center Migration

Business Challenges

- The client is a management consulting firm that manages business transformation, large programs including data center migrations.
- They wanted to build a data center migration product that allows complex data center migration visualization (with 120k configurable items) without increasing the risk, cost or impact on business services. The existing manual solution took weeks to visualize and plan the data center migration initiatives.

Solution

- EvoluteIQ designed and implemented a solution that allowed the Planning of large complex data center migration to be done visually.
- The user can set up a very large complex data center to be migrated to a more efficient structure (virtual servers, cloud based, sun-setting servers, upgrades etc.)
- Features: Configuration Item Aggregation, Rules Based Design, What-if Scenario Generation, Risk Matrix, Integrated Workflow, On-demand Real Time Dashboard Information

EQ Platform Overview

Low-Code, No-code Hyperautomation Enablement Platform

Process Flows

Automate enterprise workflows and create seamless customer and user journeys quickly.

Event Flows

Process and analyse events in real time to predict real-time threats and identify opportunities.

Decision Automation

Simplify complex decision logic to make accurate decisions in changing business environments.

Analytics and Reporting

Derive actionable insights for your business with robust analytics and present data in rich reports.

Mobile Apps

Create enterprise mobile applications that can work online or offline.

Data Flows

Handle structured and unstructured data with an easy drag-and-drop functionality.

Cognitive Capabilities

Embed intelligence in the handling of process and data attributes using dynamic ML models.

Enterprise Connectors

Integrate with business-critical systems quickly using pre-built and custom connectors.

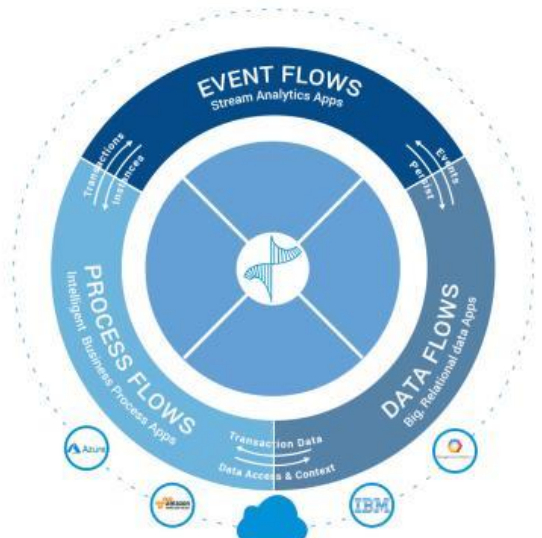

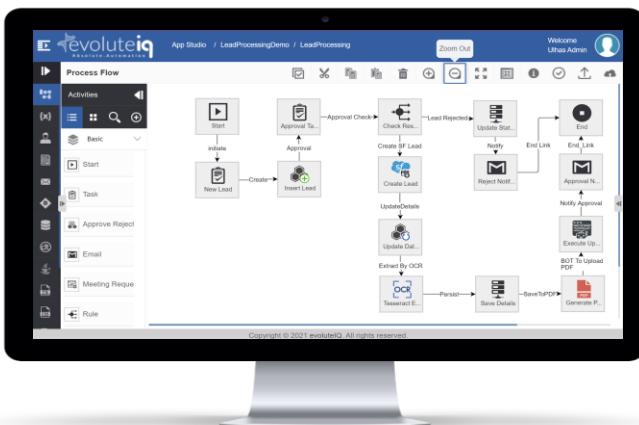

RPA

Leverage the power of non-intrusive, unified RPA.

Web Apps

Create visually appealing and dynamic web applications using new or pre-built templates.
